EHR 【EH RUBBER 10+6】

EHR EH RUBBER 10+6

最尖端的科技是不著痕跡的設計

義大利設計製造 - EH RUBBER 10+6 SBS 是由可回收橡膠製成的基座。

由於其絕佳的延展性，即便在極端的情況也能完全恢復原貌。它具有高度隔音的特性，特別設計給同屬於基座系列的NM與SE模型。

EH RUBBER 10是10mm高的固定基座；EH RUBBER 6是6mm高的固定基座，兩者可分別或組合一起使用以達到所需的高度。EH RUBBER 10+6 SBS的出現使其他基座系列的產品可以互相連結使用。

Technology is at its best when it is invisible.

EH RUBBER 10+6 is a support made of SBS recyclable rubber, designed and manufactured in Italy. If subjected to great crush performance, thanks to its elastic power, it returns to its original shape. It has a high sound absorbing property and its composition is formulated specifically to match the high performance of the "white head" present in the NM and SE models belonging to the Pedestal line.

EH RUBBER 10 is a fixed support 10 mm high. EH RUBBER 6 instead is a fixed support 6 mm high. Both can be used separately or superimposed, until they reach the required height. EH RUBBER 10+6 has been created to connect with the other product ranges belonging to the Pedestal line.

【 鋁製托梁 】

ALUMINUM JOIST

此款托梁它的一邊對前設計方便Eternalvica彈夾滑動使用，並有縱向深槽方便機械固定，另一邊有深槽設計適合各種彈夾。

Aluminum joist with binary on one side for the sliding of the Eternalvica clips, and longitudinal slot for the mechanical fastening of the same. The opposite side of the joist is equipped with a slot suitable to accommodate all types of clips.

【 鋁製托梁專用磁磚間隔器 】

TILES SPACER FOR ALUMINIUM JOIST

磁磚間隔器專門設計用來保持木板正確位置並製造間隙。它可以直接使用也可鑲嵌為T型或工型，根據現場的情況而定。彈夾有特殊配置，工人時可以避免任何接合點有突起或不密合的情況。

The Tiles Spacer with angular spacer function is designed to keep the planks in the correct location and create the escape. It is used in its original form or easily adaptable to the form of "T" or "I", depending on the geometry of the joints to achieve. The clip has a configuration that allows the insertion at any point of the joist remaining in its housing without coming out of their housing.

【 具備隔音效果橡膠 】

NOISE INSULATING RUBBER

成捲的橡膠有粘膠帶，可在托梁上全長或某些區段使用，以避免隔板與金屬的直接接觸。

It is available in practical rolls, the adhesive tape in noise insulating rubber can be placed on the aluminum joists for the entire length or in the chosen points, in order to avoid direct contact between the plates and the metal.

【周邊間隔器】

PERIMETER SPACER

美感與功能的完美結合。

ETERNO MCA義大利設計，完全不銹鋼材質，可避免戶外升高平板與外部牆壁直接接觸，搭配減震器能吸收各種熱膨脹並確保抓取的穩固性，彈夾的使用能確保地面的平穩與美觀的周邊。

The ideal combination between aesthetics and functionality

Designed by Eterno Ivica to avoid contact between the slabs of outdoor raised floors and outside walls, the perimeter spacer is made entirely from stainless steel. It incorporates a damper to absorb longitudinal and transverse thermal expansion and guarantees a secure grip. Use of these clips ensures a stable floor surface with a straight and elegant perimeter.

【垂直閉合彈夾】

CLIP FOR VERTICAL CLOSURE

針對細節要求與整體系統可靠性。

垂直閉合彈夾對各種升高地面的工程是不可或缺的配件。此創新的彈夾是由兩個互補的元素所組成；頭部與底部不需額外的五金配件固定，可直接裝置在周邊位置的 ETERNO MCA 底座上下假支撐。垂直的填入式彈夾必須與110mm直徑的頭部搭配使用。除此之外，彈性的閉合彈夾可以根據材料的厚度隨意調整，讓原有的瓷磚能夠覆蓋瓷磚的接合處。

The attention to detail, the reliability of the system

The clip for vertical closure are essential accessories for finishing according to the rules of the free edge of raised floors in correspondence of the step. This innovative solution is composed of two complementary elements- "Head" and "Base" - that are positioned with an additional hardware, respectively, to the top and bottom of Eterno Ivica supports located in the perimeter position. The vertical in-fill clips should be used in combination with 110 mm diameter heads. Furthermore, the flexibility of latches enables easy adjustment according to the thickness of the material allowing the use of the recovery tiles already present on site to coat the abutment of the step.
